

ABHISHEK TANGADE

Java Backend Developer (Fresher)

Beed, Maharashtra | abhishektangade965@gmail.com | +91 98343 97528

GitHub: github.com/abhishektangade965-crypto | LinkedIn: linkedin.com/in/abhishek-tangade

SUMMARY

Fresher Java Backend Developer skilled in Spring Boot 3.x, microservices, and event-driven architecture. Built and load-tested 3 Spring Boot applications (Kafka, Redis, MySQL), achieving 45% API latency reduction and sustaining 1,000+ msgs/sec Kafka throughput in simulated environments. Seeking a junior backend role to apply REST API design and distributed-systems fundamentals.

TECHNICAL SKILLS

- **Languages:** Java 17/21, SQL, PL/SQL
- **Core Java:** OOP, Collections, Exception Handling, Multithreading fundamentals
- **Backend Frameworks:** Spring Boot 3.x, Spring Security 6, Spring Data JPA, Hibernate
- **API:** REST APIs, JSON, JWT
- **Messaging & Caching:** Kafka, Redis
- **Databases:** MySQL 8, Oracle SQL, MongoDB (NoSQL)
- **DevOps:** Docker (Basic), Apache Tomcat, Git/GitHub
- **Tools:** Maven, Gradle, IntelliJ IDEA, Eclipse
- **Architecture:** Microservices, API Gateway, Design Patterns, SOLID principles

PERSONAL PROJECTS

Delivoos — Food Delivery Enterprise Platform

2025 – 2026

Personal Project | Spring Boot, Kafka, Redis, MySQL, Docker

- Architected 8-service event-driven microservices system using Spring Boot and Kafka, decoupling order, payment, and delivery workflows via Saga orchestration pattern
- Configured Kafka producer/consumer pipeline for order-event streaming, load-tested to sustain 1,000+ msgs/sec in local benchmark
- Cut average API response latency 45% by implementing a Redis caching layer for order/restaurant data
- Built API Gateway with 10+ REST endpoints across customer, restaurant, and delivery flows
- GitHub: github.com/abhishektangade965-crypto/Food-Delivery-Enterprise-System

SmartBank — Enterprise Banking Portal

2025 – 2026

Personal Project | Spring Boot, Spring Security 6, MySQL

- Built ACID-compliant transaction engine using Spring @Transactional and MySQL across 30+ banking operations
- Engineered 30+ REST APIs covering customer, transaction, and account management
- Implemented Spring Security 6 with JWT authentication and role-based access control (customer, teller, admin roles)
- Load-tested 10,000+ simulated transactions with zero data loss
- GitHub: github.com/abhishektangade965-crypto/Smart-Banking-Enterprise-System

Smart Logistics & Supply Chain Portal

2025 – 2026

Personal Project | Spring Boot, MySQL, Redis, REST APIs

- Built a real-time dashboard with live KPI analytics for warehouse and shipping operations
- Reduced database query volume 60% via a Redis caching layer with failover fallback to MySQL
- Designed a fuzzy-search command palette for fast shipment tracking
- Deployed application to Render.com with Aiven-managed MySQL, resolving cross-platform deployment issues
- GitHub: github.com/abhishektangade965-crypto/Smart-Logistics

EDUCATION

Bachelor of Computer Applications (BCA)

2022 – 2025 (Expected)

R B Attal College, Georai — Dr. Babasaheb Ambedkar Marathwada University | Grade: 75% (3.0/4.0 GPA)

- Relevant coursework: Data Structures, RDBMS, OOP, Software Engineering

CERTIFICATIONS & LEARNING

- Java Programming Masterclass — Udemy (Completed)
- Spring Boot Microservices — Udemy (Completed)
- SQL Query Optimization — Udemy (Completed)

SOFT SKILLS

- **Problem-Solving:** Debugged Kafka consumer lag and Redis cache-invalidation issues across microservices
- **Attention to Detail:** Designed 30+ REST APIs with structured request/response validation
- **Communication:** Documented system architecture decisions for the Kafka event-driven pipeline
