KEY ENGINEERING PROJECTS

Delivo OS — Food Delivery Enterprise Platform

2025 – 2026

Spring Boot 3.x, Apache Kafka, Redis, MySQL, API Gateway, Docker

- Architected 8 Spring Boot microservices orchestrating asynchronous order, payment, and delivery workflows using Kafka Saga design patterns.
- Integrated Redis caching layer for restaurant catalog and order status queries, achieving 45% API latency reduction under benchmark load.
- Configured centralized API Gateway routing with zero-trust request validation and rate limiting.

Tourism Management API (Tourism Hub)

2025 – 2026

Spring Boot 3.x, RESTful APIs, Spring Data JPA, MySQL, Render, Postman

- Designed and deployed 20+ RESTful CRUD endpoints for travel package booking, room reservations, and itinerary management.
- Implemented complex Spring Data JPA entity mappings (One-to-Many, Many-to-One) with optimized query fetching strategies.
- Deployed production instance on Render.com with complete Postman API collection test coverage.
